SYMBOLS

The following standard symbols are used in this publication:

| | |
|------|---|
| ... | figures not available |
| ... | figures not appropriate or not applicable |
| - | nil or zero |
| -- | amount too small to be expressed |
| x | confidential |
| p | preliminary figure(s) |
| r | revised |
| M | thousand(s) |
| MW.h | megawatt hours |
| GW.h | gigawatt hours |

Note: Components may not add to total due to rounding.

PREFACE

The Alberta Statistical Review, Quarterly provides statistical tables containing monthly or quarterly data on the economy of Alberta, as well as a brief narrative highlights page. The publication is organized into the following ten sections: Summary of Major Economic Indicators, Population, Labour Force and Related Statistics, Price Indexes, Energy and Natural Resources, Construction, Manufacturing, Agriculture, Trade and Commerce, and Travel. The majority of the tables present data at the provincial level while others present data for communities or compare the economy of Alberta with that of Canada and other Provinces.

To obtain additional information regarding this publication, the data within, or statistical updates, users are invited to contact the Information Services Section, Alberta Bureau of Statistics, (403) 427-3058.

HIGHLIGHTS
AND
SUMMARY OF MAJOR ECONOMIC INDICATORS

HIGHLIGHTS

- During the 3-Q-83, Alberta's population declined by 1,400 persons to reach a level of 2,363,300 on 1-Oct-83. This population loss was largely due to a continuing decline in net migration; for the first time population loss through net migration (9,100 persons) outweighed population growth through natural increase (7,700 persons). Despite the currently high levels of out-migration, Alberta's population has increased 0.6 percent since the beginning of 1983.
- At 10.8 percent in 1983, Alberta's unemployment rate, although continuing to rise, remains among the lowest in Canada. Alberta's increased 1983 unemployment rate was the result of a growing labour force (up 1.8 percent since 1982) and declining employment (down 1.5 percent). Employment declines were most severe in Edmonton and Calgary, where the total number of employed persons fell 2.2 percent between 1982 and 1983, compared with an employment decline throughout the remainder of the province of 0.4 percent.
- During Dec-83, the all-items Consumer Price Index (CPI) for Edmonton and Calgary rose slightly over Nov-83, 0.2 percent and 0.1 percent respectively. On an annual average basis (comparing 1982 and 1983), the CPI for both Edmonton and Canada advanced 5.8 percent during 1983. The CPI for Calgary increased 4.6 percent over the same period. This was the lowest increase among the cities for which CPI's are produced.
- Although apartment dwelling starts in Alberta more than doubled from Nov-83 to Dec-83, total dwelling starts were down 26.1 percent. In Alberta and Edmonton, annual single detached dwelling starts increased 27.0 percent and 70.6 percent respectively between 1982 and 1983, while that for Calgary decreased 3.1 percent.
- During the first eleven months of 1983, retail sales transacted within Alberta totalled \$9,973 million, an increase of 1.9 percent with respect to the same 1982 period. This was one of the lowest increases registered for any of the provinces. At the national level, year-to-date retail trade increased 7.4 percent between 1982 and 1983. Selected types of retail establishments experienced sales declines between 1982 and 1983, most notable were personal accessories stores (down 6.9 percent); sporting goods and accessories stores (down 5.8 percent); and furniture, T.V., radio and appliance stores (down 5.0 percent). By comparison, increases were recorded for pharmacies, patent medicine and cosmetic stores (up 15.0 percent); book and stationery stores (up 10.5 percent); and florists (up 15.1 percent).

GLOSSARY

GLOSSARY

AVERAGE WEEKLY EARNINGS

Average weekly earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc. This includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, payments to persons absent with pay in the survey reference week, and overtime earnings (all pay received for the number of hours worked in excess of the standard workday or workweek). The payroll concept does not include supplementary labour costs.

Effective Apr-83, amendments were made to the survey used in collecting this data. Major alterations include:

- 1) The inclusion of firms of all sizes rather than only those with 20 or more employees.
- 2) The expansion of industrial coverage. The survey previously covered all industries except agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households, and public administration and defence. Survey coverage has been augmented to include education, health and welfare services, and public administration.

Due to these changes in survey methodology, data from the new survey is not comparable with that previously garnered. To ease the transition period, Statistics Canada is continuing to publish a compatible series of monthly Industrial Composite data for Canada and each of the provinces. This is a synthetic series, using the new survey data to approximate the old survey Composite.

Please be warned, because of the many changes that comprised the survey's revisions in Apr-83, it is not possible for Statistics Canada to exactly reproduce the old Industrial Composite. This information is presented in Table 18 of this publication. All other earnings data within this publication (Tables 19 through 24) are from the new Employment, Payrolls and Hours survey.

BANK RATE

The Bank Rate is the minimum rate at which the Bank of Canada makes short-term advances to the chartered banks or to savings banks governed by the Quebec Savings Bank Act, and after 1-Dec-80 to all members of the Canadian Payments Association. Data shown is for the last Wednesday in the reference month.

BUILDING PERMITS

Residential Building Permits - Number

Number of dwelling units created:

- 1) Single
Refers to structures containing only one dwelling unit completely separated from any other dwelling or structure.
- 2) Cottages
Refers to seasonal dwellings such as summer homes and house-boats.
- 3) Double
Refers to dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.
- 4) Row
Refers to one-family dwellings in a structure of three or more attached dwellings.
- 5) Apartments
Refers to all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats which are part of a non-residential structure are also included.
- 6) Conversions
Refers to dwelling units added by conversion of existing structures

Residential Building Permits - Value

Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

BUILDING PERMITS (CONTINUED)

Non-Residential Building Permits

Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

1) Industrial Building Permits

Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

2) Commercial Building Permits

Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial - signs, posters, heating and plumbing installations, etc.

3) Institutional and Government Building Permits

Includes expenditures made by the community, public and government for buildings and structures - schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, etc.

CANSIM

CANSIM is the name given to Statistics Canada's computerized data base. It is often termed a general purpose data bank offering a detailed and conceptually compatible set of aggregate data pertaining to a large number of interrelated fields. CANSIM contains over 360,000 timeseries of socio-economic information. An example of a timeseries would be the annual population of Edmonton for a twenty-year period.

The Alberta Bureau of Statistics maintains approximately 6300 timeseries on CANSIM of Alberta specific data at both the provincial and sub-provincial level.

The majority of information contained in this publication is available on CANSIM. For your convenience we have provided CANSIM matrix numbers at the bottom of most tables.

CONSUMER PRICE INDEX

The Consumer Price Index(CPI) is a price index which measures the percentage change through time of a constant quantity and quality of goods and services purchased by a representative Canadian urban family in a specified time period. The CPI for each city measures price changes from one time period to another within that specific city. Thus, while city CPI's show the movement of prices in each city, they do not indicate price level differences between cities, or between cities and Canada. The CPI is not a measure of true inflationary-deflationary trends. The inference of using the CPI as a measure of true inflation or deflation is incorrect. The CPI only measures percentage changes of a "basket" of commodities - not all items which contribute to inflation or deflation are included.

CONVENTIONAL MORTGAGE RATE

The conventional mortgage rate is a simple average of rates as at mid-month charged by a number of large institutional lenders for residential mortgage loans.

DEPLANED

Traffic (passengers, mail and cargo) which lands and disembarks at an airport.

DWELLING COMPLETION

Dwelling completion is the stage at which all the proposed construction work on a dwelling unit has been performed.

DWELLING START

A dwelling start is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

DWELLING UNITS

Please note, the following definitions are applicable only to data from the Survey of Starts and Completions.

1) Single Detached

This is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

2) Semi-Detached

This category includes each one of two dwellings separated by a common wall extending from ground to roof, or by a garage.

3) Row

This comprises only single attached houses in a row of three or more dwellings. Row-duplexes are not included in this category.

4) Apartment and Other

This category includes dwelling units such as:

- duplexes
- double duplexes
- triplexes
- row-duplexes

apartments as commonly known
dwellings over, or at the back of, a store or
other non-residential structure.

EMPLOYED

The employed labour force includes all persons who during the reference week:

1) did any work at all

2) had a job but were not at work due to:

- own illness or disability
- personal or family responsibilities
- bad weather
- labour dispute
- vacation
- other reason not specified above.

ENPLANED

Traffic (passengers, mail and cargo) which embarks and takes off from an airport.

FARM CASH RECEIPTS

Farm cash receipts include the cash returns from the sale of all agricultural products except those associated with direct inter-farm intraprovincial transfers. Other components included are Wheat Board payments, cash advances on farm-stored crops, deferred grain receipts in Western Canada, Agriculture Stabilization Act deficiency payments, Western Grain Stabilization Act payments, and provincial income stabilization payments.

LABOUR FORCE

The labour force is composed of that portion of the civilian non-institutional population fifteen years of age and over who, during the reference week were employed or unemployed.

LABOUR INCOME

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance.

MIGRATION

Migration is defined as a permanent change of residence from one geographical unit to another.

NET MIGRATION

Net migration is the difference between in-migration and out-migration for a geographical unit.

NEW HOUSING PRICE INDEX

The new housing price index measures changes in selling prices of new houses constructed by large and medium volume builders in metropolitan areas. The houses sampled are representative of the total being sold at that time but adjustments are made for changes in physical characteristics to arrive at pure price change. Prices used are the selling prices agreed upon between builder and buyer at the time of signing the contract. Prices relate to mid-month. The composite index includes the house and the serviced lot on which it stands.

NEWLY COMPLETED UNOCCUPIED DWELLINGS

Newly completed unoccupied dwellings are those which are not sold nor rented at the time the dwellings are reported as completed in the Survey of Starts and Completions. The units are surveyed every month until they are sold or rented.

NOT IN THE LABOUR FORCE

That portion of the civilian non-institutional population fifteen years of age and over who, during the reference week were neither employed nor unemployed.

PARTICIPATION RATE

The participation rate represents the labour force as a percentage of the population fifteen years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the employment in that group expressed as a percentage of the population for that group.

PRIME RATE

The Chartered Banks' Rate on Prime Business Loans is the rate charged to the most credit-worthy borrowers. The rate shown is of the last Wednesday of the month. When there are differences in the rate charged by individual banks, the most typical rate or rates are taken.

RETAIL TRADE

Retail trade is defined as the aggregate sales made through retail locations(outlets). Retail trade estimates do not include any form of direct selling which bypasses the retail store, for example: direct door to door selling; sales made through automatic vending machines; sales of newspapers or magazines sold directly by printers or publishers; and sales made by book and record clubs. Retail trade excludes: retail sales through ancillary units, for example, warehouses, head offices, etc.; sales of contractors whose major activity is not retailing; and retail transactions between individuals.

SEASONAL ADJUSTMENT

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods, grain receipts in Western Canada, deficiency payments made by provincial governments and the agricultural stabilization board, and provincial income stabilization payments.

UNEMPLOYED

The unemployed includes those persons who during the reference week:

- 1) were without work, had actively looked for work in the past four weeks (ending with reference week) and were available for work.
- 2) had not actively looked for work in the past four weeks but had been on layoff for twenty-six weeks or less and were available for work.
- 3) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available for work.

UNEMPLOYMENT RATE

The unemployment rate represents the number of unemployed persons as a percent of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the unemployment in that group expressed as a percent of the labour force for that group.

VALUE OF MANUFACTURING SHIPMENTS

Value of manufacturing shipments is defined as the gross value of goods produced from its own materials by the reporting establishment, or for its account. Value is net of discounts, returns and allowances, sales tax, excise taxes and duties, returnable containers and common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Shipment values in this publication are monthly projections of annual census of manufacturers' values based on returns from a stratified systematic sample of manufacturing establishments.
